FRIGIDAZZI'S INVITATIONS

Dearest Avatar, I would like to congratulate thee from the bottom of mine heart, on obtaining thy spellbook. That was not an easy task. Thou didst accomplish it most admirably. Also, I have been told that thou art asking questions about me. I think I would be the best person from whom to obtain the ultimate answers to thy questions. That is, the ones concerning myself. For all those reasons and so many more, I would like for thee to come to my manor. Frigidazzi.

Dearest Avatar, Love and Honor be to thee. Letting thee know that I cannot wait to see thee again. I cannot think of time far from thy strong person and handsome body. Thy broad shoulders and great arms are such an open invitation for a woman like me. Thine eyes, Avatar, so piercing yet so full of love. I could feel that love during thy last visit. I beg of thee, come visit me tonight. Thou dost remember where my manor is, dost thou not? I have a very rare spell (a true tongue-twister) I could teach thee and thou wouldst be the only one enjoying that treasured

spell of mine. Once more,
I beg of thee, do come
tonight and do come
alone. Thy love, Frigidazzi.

Dearest Avatar, A
thousand apologies is what
I present thee with. I am
the one who caused thee
to be arrested and I
cannot forgive myself.
Thou hauntest my dreams.
Memories of thee flash in
front of mine eyes and
the only way I can solve
this nightmare is by
presenting thee with a
very special gift. I beg
of thee to accept these
Serpent Earrings, a token
of mine affection for
thee, Avatar. Frigidazzi.

Dearest Avatar, Love and
Honor be to thee. Letting
thee know that I cannot
wait to see thee again. I
cannot think of time far
from thy strong and
good-hearted person. Thine
eyes, Avatar, so piercing
yet so full of love. I
could feel that love
during thy last visit. I
beg of thee, come visit
me tonight. I have a very
rare spell I could teach
thee and thou wouldst be
the only one learning it.
Once more, I beg of thee,
do come tonight and do
come alone. Sincerely thy,
Frigidazzi.
